

Rajendra R

Lead Full Stack Developer | Python, FastAPI, Flask, Django | PostgreSQL | React | AI/LLM | SaaS

India (Remote) | surendrar7000@gmail.com | github.com/rajendrar56 | linkedin.com/in/surendraa-s-986715428/ | upwork.com/freelancers/surendras36

PROFESSIONAL SUMMARY

Lead Full Stack Developer with 8+ years of experience building, shipping, and maintaining production web applications, SaaS products, and backend systems. Strong in Python (FastAPI, Flask, Django), Ruby on Rails, React, TypeScript, REST APIs, PostgreSQL, background jobs, and cloud deployment. Experienced in end-to-end product development—from API design and MVP features to testing, CI/CD, production support, and scaling. Hands-on with AI/LLM integrations, third-party services, and ecommerce, DAM, and health-tech domains. Comfortable owning delivery remotely for global startups and Upwork or long-term contracts.

CORE TECHNICAL SKILLS

Backend & Frameworks: Python, FastAPI, Flask, Django, Ruby on Rails, Node.js, REST APIs, Microservices, Background Jobs

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3

Databases & Caching: PostgreSQL, SQL, Redis, Data modeling, Query optimization

AI / Automation: LLM APIs, Generative AI, Prompt engineering, RAG, Workflow automation

Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Jenkins, CI/CD

Quality & Delivery: pytest, RSpec, API testing, TDD, Code reviews, Agile/Scrum, Production support

PROFESSIONAL EXPERIENCE

Everbee (contract) — Senior Software Developer

2024 – 2026 | Remote

Owned full-stack delivery of production web applications and APIs using Ruby on Rails, React, Python, and PostgreSQL in a fast-moving product environment.

Integrated AI/LLM capabilities into live application workflows, supporting prompt-based features and generative AI use cases.

Built and maintained reliable backend services, REST APIs, and background processing for production systems.

Improved application quality through automated testing, API testing, debugging, and production troubleshooting.

Collaborated with cross-functional teams to translate requirements into shippable features and maintain stable releases.

Natureglobal — Senior Software Engineer

2020 – 2024 | Remote

Delivered full-stack SaaS and product engineering using Ruby on Rails, React, Python, Node.js, and REST APIs across complex business domains.

Designed and implemented backend systems, API integrations, and application features for production customer-facing products.

Worked with AI/LLM and modern software technologies to extend product capabilities and improve user-facing workflows.

Reviewed system behavior, identified defects, and resolved production issues through root-cause analysis and quality-focused debugging.

Partnered with development teams and stakeholders to clarify requirements and ship maintainable, scalable application code.

Kangaroo Software — Software Engineer

2018 – 2020 | India

Built web applications and REST APIs with focus on data handling, validation, and dependable backend behavior.

Developed core product features and backend integrations while working within defined functional requirements.

Performed functional testing, debugging, and defect resolution to improve application reliability.

Supported API development and data validation workflows for production-facing software systems.

SELECTED PROJECTS

Bynder — Enterprise digital asset management (DAM)

Tech Stack: React, TypeScript, Node.js, SaaS, Cloud

Full-stack delivery on a cloud DAM platform used by global brands to manage, approve, and distribute creative assets.

Built production features around workflows, integrations, and performance for high-traffic marketing teams.

Everbee — AI-powered ecommerce & print-on-demand growth

Tech Stack: React, Node.js, AI/LLM, Ecommerce, APIs

Engineered full-stack product capabilities for sellers scaling print-on-demand and ecommerce workflows.

Integrated AI-assisted merchandising and automation into customer-facing experiences on everbee.io.

Algocyte — At-home clinical blood testing & health AI

Tech Stack: AI/ML, React, TypeScript, HealthTech, IoT

Contributed to a regulated health-tech platform pairing connected instruments with companion software and clinician dashboards.

Delivered full-stack features supporting device workflows, results visibility, and production-grade UX on algocyte.ai.

EDUCATION

B.Tech in Computer Science / Engineering

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal, MP, India | 2014 – 2018
