

RAJENDRA S

SENIOR FULL STACK DEVELOPER | RUBY ON RAILS | PYTHON | FASTAPI | FLASK | REACT.JS | POSTGRESQL | AWS

India | errajendra56@gmail.com | GitHub: github.com/rajendrar500

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of experience building scalable web applications, SaaS platforms, REST APIs, microservices, and cloud-based systems. Strong across Ruby on Rails, Python (FastAPI, Flask), React.js, PostgreSQL, AWS, Docker, and CI/CD. Experienced in API design, database optimization, authentication, multi-tenant systems, payment integrations, background processing, and production support.

TECHNICAL SKILLS

Languages	— Ruby, Python, JavaScript, TypeScript, SQL
Backend	— Ruby on Rails, FastAPI, Flask, Node.js, REST APIs, GraphQL, Microservices, API Design, Pydantic
Frontend	— React.js, JavaScript, TypeScript, HTML5, CSS3
Databases	— PostgreSQL, MySQL, MongoDB, Redis, SQLAlchemy, ActiveRecord
Security	— JWT, OAuth2, RBAC, Authentication, Authorization, API Security, Multi-Tenant Access Control
Async Processing	— Sidekiq, Celery, Redis, RabbitMQ
Cloud & DevOps	— AWS, Docker, Kubernetes, ECS, Lambda, S3, RDS, GitHub Actions, GitLab CI, Linux, CI/CD
Testing	— RSpec, Pytest, Unit Testing, Integration Testing, API Testing, TDD
Integrations	— Stripe, Payment APIs, Webhooks, OAuth, SMS APIs, IoT APIs, Third-Party APIs
AI / GenAI	— LLMs, RAG, AI Agents, LangGraph, LangChain, MCP, Embeddings, Vector Databases, OpenAI APIs

PROFESSIONAL EXPERIENCE

Full Stack Developer | Full-Time Freelancer

Sep 2026 – Present

Upwork | Remote

- Develop web applications and REST APIs using Python, Ruby on Rails, Node.js, and React.js.
- Build backend services, business logic, database integrations, authentication, and third-party integrations.
- Develop reusable React.js components and full-stack features end to end.
- Work with clients on requirements, technical solutions, estimation, development, testing, and delivery.
- Handle debugging, performance optimization, deployment, and production support with Git, Docker, CI/CD, and cloud platforms.

Senior Full Stack Developer | Contract

Sep 2024 – Aug 2026

Everbee | Remote

- Developed full-stack applications using Ruby on Rails, React.js, and Python.
- Designed REST APIs, backend services, authentication, authorization, and third-party integrations.
- Built React.js features and optimized PostgreSQL schemas, queries, relationships, and indexes.
- Implemented background processing and asynchronous workflows with job-processing systems.
- Worked with AWS, Docker, CI/CD, monitoring, and production deployments; resolved production issues and delivered features with Agile teams.

Senior Software Developer

Aug 2020 – Jul 2024

Natureglobal | Remote

- Developed scalable backend applications and REST APIs using Python, Node.js, and React.js.
- Implemented business logic, authentication, authorization, data validation, and third-party API integrations.
- Built React.js frontend features integrated with REST APIs.

- Designed and optimized PostgreSQL databases, queries, indexes, and data models.
- Built asynchronous workflows and background processing; supported Docker, Linux, CI/CD, and production operations.

Software Developer

Jun 2018 – Jul 2020

Kangaroo Software | India

- Developed web applications using Ruby on Rails, React.js, and JavaScript.
- Designed REST APIs, validations, authentication, and database workflows.
- Built reusable React.js components and integrated third-party APIs.
- Maintained PostgreSQL schemas, queries, and indexes; wrote tests and supported production fixes.

SELECTED PROJECTS

Sales Engagement SaaS — Salesloft

Live salesloft.com | **Technologies** Ruby on Rails, React, JavaScript, REST APIs

- Developed Rails features and REST APIs on a large production SaaS platform.
- Built React.js components for sales workflows; contributed tests, reviews, and stability fixes.

Multi-Tenant Fintech API — Prodigy Finance

Live prodigyfinance.com | **Technologies** Python, FastAPI, Flask, PostgreSQL, MongoDB

- Built production APIs with FastAPI and Flask for fintech workflows.
- Implemented multi-tenant architecture with tenant-level API and database isolation.
- Delivered backend features and production fixes across PostgreSQL and MongoDB.

Payment Gateway with Stripe — AcceptPay Global

Live acceptpayglobal.com | **Technologies** Ruby on Rails, React, PostgreSQL, Stripe

- Integrated Stripe into a Ruby on Rails application with state-machine payment lifecycles.
- Built React.js screens and backend APIs for payment creation, tracking, and review.

Ruby on Rails 8 Upgrade — Bynder

Live bynder.com/en | **Technologies** Ruby on Rails, Rails 8, React, JavaScript, Python, PostgreSQL

- Upgraded production from Rails 7.1 to Rails 8 using zero-downtime deployment.
- Fixed security and dependency issues across Rails, Python, and Go repositories.
- Supported staged rollout, rollback planning, and post-upgrade validation.

KEY ACHIEVEMENTS

- Improved API response performance by up to 40% through backend and database optimization.
- Increased RSpec test coverage from 0% to 85% on critical application workflows.
- Built production REST APIs with Ruby on Rails, FastAPI, and Flask.
- Delivered secure multi-tenant SaaS/fintech systems and Stripe integrations; completed Rails 7.1 → 8 upgrade with zero downtime.

AI / GENAI & DEVOPS

AI / GenAI — LLMs, RAG, AI Agents, LangGraph, LangChain, MCP, OpenAI APIs, Embeddings, Vector Databases — built LLM/RAG workflows and FastAPI services with secure OpenAI integration.

Cloud & DevOps — AWS, Docker, Kubernetes, ECS, Lambda, S3, RDS, CI/CD, GitHub Actions, Linux — containerization, deployments, monitoring, logging, and production troubleshooting.

EDUCATION

RGPV University, Bhopal | 2014 – 2018
